Project Details

Problem Statement No.	PS No. 4
Project Title	Duplicate Data Finder
Language	Python 3
Concepts Covered	Lists, sets, loops, file handling
Input	Text file (data.txt), one entry per line
Output	Total and unique counts, duplicates with repeat counts, unique.txt
Menu Options	1. Exact match 2. Ignore case and extra spaces
Deliverables	Code file (.py), testcase.pdf, data.txt, README.md, project image

Project Summary

A console program that reads entries from a text file, identifies repeated entries, reports the total and unique counts, and saves the unique entries to **unique.txt**. It validates the file name and menu option and handles an empty file.
